Belgrade, October 22nd

Dear Sir/Madame,

The Inter-Party Dialogue (IPD) that was conducted between Serbian regime and the opposition has ended in utter failure for which whole responsibility lays entirely on you as European inter-mediators that had decided to abandon European values and stand in defense of non-democratic and autocratic regime of Aleksandar Vucic. The document that you proposed at the end of the IPD has been adopted only by two relevant political parties of the regime, SNS and SPS, brought no necessary changes. This claim is supported by findings and analysis made by relevant NGO's in Serbia that are experts in the matter. Furthermore, yet another confirmation that the document that you had proposed is meaningless are newly proposed changes in Serbian Information Law (few days ago) as a result of the document adopted by Serbian regime and you. Most notably, the only change made in this law is ONE article by which is stipulated that national TV emitters should publish their marketing tariffs before the start of electoral campaign!?

The bodies that you formed have no purpose because they have no executive powers and they are dealing exclusively with media monitoring and only during the electoral campaign and they are consisted of REM representatives, who didn't bother to uphold the law and do their job so far and they don't intend to.

With consideration of the relationship and the way you treat people who are struggling for the idea of Serbia in European Union and your univocal and doubtless support for Vucic's regime, we are kindly asking you to restrain yourself from sending us any further documents connected with the IPD that you led. On our openly and sincerely expressed willingness for cooperation and return of democracy to Serbia, you answered with the proposal that you'd comprised with representatives of the Serbian regime from SNS and SPS and which consist of no essence except cosmetics. By doing so, you literally slapped all of us who are working for 30 years in order to bring Serbia to European Union and convincing our people that EU is our greatest friend and supporter, our pillar and our future.

All mentioned above makes any further discussion or brain-storming about a paper that you had comprised, pointless.

Dragan Djilas

President of the Party of Freedom and Justice

Serbia
